### **Solving 2 Step Equations Word Problems Worksheets ...**

Two step math equations are algebraic problems that require you to make two moves to find the value of the unknown variable. For example, using the equation  $3x + 5 = 11$  we will need to perform two steps to find the value of  $x$ . The first step would be to get the constant values of the equation by themselves. In this case 5 and 11 are our constants.
