Backyard Farming

Fruit Trees Berries

Berries in the genus *rubus* are also known as brambles, and they are among the easiest and most popular of all backyard fruits. They have a network of perennial roots that send up shoots, or canes, which usually live for two years. In the first year of growth, the canes are vegetative, producing only leaves.

There are lots of different types of fruit trees that grow well in temperate climates.

Apples, peaches, plums, nectarines, pears, and cherries can all be grown in

Northern Ohio for example. Fruit trees form an essential part of a permaculture food forest. They can be planted with other
