The motherboard is the most important part of a computer. Every other computer part connects to the motherboard. If the motherboard does not work, none of the other parts will either. The cpu or processor is the computer's brain. It is in charge of telling your computer what computer processes to do and when to do them.

The Ultimate Computer Repair Guide - St0rage.org

Training manuals play a critical role in employee training by teaching new employees about a company and its processes. Existing employees grow and learn about new systems, tools, or software. Employees who are not constantly learning or new hires who are not familiar with the tools, apps, software, or machinery used by their company can become disengaged in their work.
