Resources | Forest Gardening in Practice

I am more interested in how they do (and sometimes don't) work, and in the people who are working in and with them. In my book, Forest Gardening in Practice you will meet some of the pioneers who have been planting, tending and harvesting their sites, often away from the spotlight of media and research, for years and sometimes decades. Each of these case studies is a tale of discovery and self-discovery, of successes and setbacks, sometimes planned and often unsuspected.

Welcome to Forest Gardening in Practice | Forest Gardening ...

Forest gardening is a low-maintenance, sustainable, plant-based food production and agroforestry system based on woodland ecosystems, incorporating fruit and nut trees, shrubs, herbs, vines and perennial vegetables which have yields directly useful to humans. Making use of companion planting, these can be intermixed to grow in a succession of layers to build a woodland habitat. Forest gardening is a prehistoric method of securing food in tropical areas. In the 1980s, Robert Hart coined the term
