Stocks. Stock Preparation. The two most popular types of stocks are white stock and brown stock. These classifications refer, in general, to the contents and preparation methods of the stock, not necessarily to its color. A white stock made with beef and beef bones will be slightly brown in color; nonetheless, it is considered a white stock due to the method of preparation.

To prepare a stock solution, weigh out the required amount of the compound and place it in a clean flask. It is common practice to make a stock solution 10x or 100x, depending upon the solubility of the compound. Once the chemical is in the flask, dissolved it in a small amount of water, ethyl alcohol, 1 N NaOH, or 1 N HCL.
