The King Air 350 and its many variants have been marketed under a number of different names, making the lineage somewhat difficult to follow. The King Air 350, also known as the King Air B300, was initially marketed as the Super King Air 350 in 1990, when it was created as the successor to the King Air 300, but the "Super" designation was dropped in 1996.

## **What Are the Differences Between the King Air 350, B300**

...

The King Air performance manual says that this descent profile will take 20 minutes, 103 miles, and 245 pounds of fuel.

Approach As you near the approach phase of flight, begin to bring the power back to around 55 percent torque or less, so that you're below 180 KIAS by your initial approach fix (use the

joystick throttle, or press F2 ).
