Koala

The koala or, inaccurately, koala bear (*Phascolarctos cinereus*) is an arboreal herbivorous marsupial native to Australia. It is the only extant representative of the family Phascolarctidae and its closest living relatives are the wombats, which are members of the family Vombatidae. The koala is found in coastal areas of the mainland's eastern and southern regions, inhabiting Queensland, New ...

Koala - Wikipedia

The koala is an iconic Australian animal. Often called the koala “bear,” this tree-climbing animal is a marsupial—a mammal with a pouch for the development of offspring.

Koala, facts and photos - National Geographic

Koala, tree-dwelling marsupial of coastal eastern Australia. It is about 60 to 85 cm (24 to 33 inches) long and weighs up to 14 kg (31 pounds) in the southern part of its range but only about half that in the northern part. It resembles a small bear, and it is sometimes called, albeit erroneously, the koala bear.

koala | Facts, Diet, & Habitat | Britannica

Koala: Facts, Baby, Eat, Live, Endangered, Dangerous ...

Koala joeys learn to eat eucalyptus leaves on their own gradually. At first the joey goes after leaves with its mouth. Its early attempts look like a game of bobbing for apples, with its nose getting in the way and pushing the leaves out of reach! Fortunately, joeys keep trying until they are successful.

Koala | San Diego Zoo Animals & Plants

The Koala is an ultra-rare pet that can be hatched from the Aussie Egg, which can be found in the Gumball Machine and costs 750. In the preview, the Koala has gray fur with a lighter gray belly. It has pink on the inside of its ears and has black eyes and a long black nose. It stands on two legs.

Koala pouches are positioned in the lower portion of a koala's body. The pouches open outward so a joey (baby) can climb into it from the birth canal. When a joey is present, its mother uses her sphincter muscles to make sure that the pouch is closed so that her baby won't fall out.

Koala Facts: Habitat, Behavior, Diet - ThoughtCo

3) Although you may have heard people call them koala 'bears', these awesome animals aren't bears at all - they are in fact marsupials. A group of mammals, most marsupials have pouches where their newborns develop. 4) When an infant koala - called a joey - is born, it immediately climbs up to its mother's pouch. Blind and earless, a joey uses its strong sense of touch and smell ...

10 fascinating koala facts! | National Geographic Kids

Koalas are marsupials, related to kangaroos. Most marsupials have pouches where the tiny newborns develop. A koala mother usually gives birth to one joey at a time. A newborn koala is only the size of a jelly bean. Called a joey, the baby is blind, naked, and earless. As soon as it's born, this tiny creature makes its way from the birth canal to its mother's pouch.
