Call a heat pump repair technician to make the adjustment or, if you are handy with this type of repair, follow the instructions in your owner's manual to reset the pointers on the fan side of the limit control. The lower pointer should be set to about 90 degrees F. and the upper one should be at about 115 degrees F.

Heat Pump Troubleshooting & Repair | HomeTips

We built our home in 2012 and installed a new Lennox heat pump. It started having issues during our second summer in the home, and it completely stopped operating this spring, 2019. Since it has a five year warranty, Lennox will not take any responsibility for replacing it. My experience with its customer service department was ridiculous.
