University of Aveiro. It provides 2D Localization and SLAM. It works great on a TurtleBot2 with a Raspberry Pi 3 Model B+ and an Hokuyo (Rapid URG). Build. To build LaMa ROS, clone it from GitHub and use catkin to build.

ROS Index

Hello ROS community,
Since gmapping is a SLAM algorithm, I would like to use both

Access Free Mapping And Localization Ros

the map and the localization being computed by this algorithm. From what I have seen so far, gmapping only publishes the /map and does not provide any such localization information (i.e. an estimate of the robot pose). My question is this: Is the gmapping package in ROS performing SLAM?
