Graphs, Charts & Diagrams. Data can be represented in many ways. The 4 main types of graphs are a bar graph or bar chart, line graph, pie chart, and diagram. Bar graphs are used to show relationships between different data series that are independent of each other. In this case, the height or length of the bar indicates the measured value or ...

How to describe charts, graphs, and diagrams in the ...

'Chart' is also used to refer to complex and data-dense displays such as maps. 'Graph' tends to be used more in more mathematical settings, with x and y axes, but there are many exceptions. 'Diagram' usually implies a symbolic and non-numeric representation of something, but again, there are exceptions.

Charts, Graphs, & Diagrams Home Page

Lawyers commonly use charts, diagrams, sketches, graphs, and maps to explain, simplify, or supplement oral testimony at trial. For example, a surveyor may use a map to demonstrate where boundaries begin and end as an aid to expert testimony. A layperson may use or draw a map to describe where an incident occurred.
