Install it in the R5 slot with the unbanded end at the left and the banded end in the far right (12V) hole. Other than that, you just need to connect the IAC hole to the pin on the adapter board that controls the IAC if you have a 2 wire PWM IAC valve. To control a 3 wire IAC valve, install the ENABLE jumper next to Q13.

Extra Inputs and Outputs - DIYAutoTune.com

One powerful feature of the Tinker Board S is the row of available GPIO (general purpose input/output) pins along the edge of the board. These pins are a physical interface between the Tinker Board S and the outside world. At the simplest level, you can think of them as switches that can be turned on or off.
