Rig Tuning Guide

Fortunately, rig tuning is a straightforward step by step process for both masthead and fractional rigs. The goals in rig tuning are the following: (1) Eliminate side bend and lean, (2) Set mast rake for proper helm balance, (3) Set pre-bend to match the mainsail design, and (4) Control mast bend and headstay sag.

How to Tune Your Rig | North Sails

The aims of RIG TUNING are as follows: a. Ensure a straight mast athwartships b. Control sail shape. c. Achieve proper helm balance in a variety of conditions d. Spread loads appropriately on spars, rigging and boat. Different rig configurations require a different rig tuning process:-----RIG TUNING - SINGLE SPREADER MASTHEAD RIG

What You Need to Know About Rig Tune & Performance

...

With the lower shrouds loose, measure to the same point on the toe rail on both the Port and Starboard sides, make adjustments to the upper shrouds as necessary until the measurements are equal on both the Port and Starboard side. Tension the upper shrouds equally until the tension reads 25 on the Loos gauge.

C22 RIG Tuning Guide - Sailboat Owners

Tighten the cap shrouds to approx.15% of breaking load. This corresponds to an elongation (f) of 3 mm over a length of 200 cm as indicated on the previous page. On a fractional rig with aft swept spreaders the cap shrouds should be tensioned to 20% of the breaking load. This corresponds to an elongation of $f = 4$ mm.

Dragonforce 65 Setup, Tuning and Review - Klaus Harris

Rig tune is a simple phrase used to encompass a concept that can be as complex or as straightforward as you want to make it. Essentially, any boat will benefit from having its mast (s) in the right position in the boat with the proper amount of tension applied to the shrouds and stays.

Basic Rig Tune for Most Boats - Sailboat

UK Sailmakers' Encyclopedia of Sails. 8.1 - Tuning Your Rig. The first objective in tuning a rig is to get the mast centered in the boat and standing straight. Once this is achieved, refinement of the tuning will improve the boat's performance by changing the balance of the helm and, more importantly, by controlling sail shape.

8.1 - Tuning Your Rig — UK Sailmakers

Make sure that the mast is positioned as far aft at deck level as possible. Have a friend hold the end of your tape at the stem measurement point and measure again straight to the lower edge to the mast band. We want this measurement to be as close to maximum as possible, 2925mm.
