Shook Over Hell Post Traumatic

"It is difficult for this reviewer, as a psychiatrist and historian, to overstate his enthusiasm upon learning of Eric Dean's account of Post-Traumatic Stress Disorder (PTSD) in veteran populations from both the American Civil War and Vietnam War in Shook Over Hell. Until this work was published, there certainly existed a common misperception that Vietnam veterans were a unique group of emotional cripples, suffering a markedly exaggerated rate of psychiatric disability in comparison with ...

Shook over Hell — Eric T. Dean, Jr. | Harvard University Press

The author concludes that "these men did indeed suffer from what we would today think of as PTSD" -- that is, the "post-traumatic stress disorder" frequently associated nowadays with troubled veterans of the Vietnam War. Shook Over Hell makes a real contribution to our understanding of the Civil War, and that is no small achievement.

By Eric T. Dean Jr. Shook over Hell: Post-Traumatic Stress ...

Eric T. Dean Jr.'s path breaking study Shook Over Hell found that over half of the residents of an Indiana Civil War veterans' home either attempted or completed suicide or were suicidal. The downward spiral of Albinus Snelson, a Georgia native who served in the Confederate Cavalry, exemplifies a recovery-and-relapse cycle peppered with multiple suicide attempts.

Post Traumatic Stress Disorder and the American Civil War ...

Written by a lawyer-historian this book is a review of statistics and anecdotes about post-traumatic stress disorder (PTSD) from past wars. The author concludes that the syndrome does not exist. This opinion resembles that of the current Bush administration in trying to eliminate veteran's benefits for this syndrome.

Shook over hell : post-traumatic stress, Vietnam, and the ...

Abstract. Background. In connection with the challenges of modernity, PTSD is a serious problem of general and especially military psychiatry. The diagnosis of "PTSD" is, in the first place, etiologically determined, but both "developmental and clinical assessment of this condition" have such "non-medical" factors as social and family-associated ones.
