We can prepare a homogeneous saturated solution by adding excess solute (in this case, greater than 35.9 g of NaCl) to the solvent (water), stirring until the maximum possible amount of solute has dissolved, and then removing undissolved solute by filtration. The solubility of most solids increases with increasing temperature.

13.2: Saturated Solutions and Solubility - Chemistry ...

Solution. According to Henry's law, for an ideal solution the solubility, C g, of a gas (1.38×10^{-3} mol L $^{-1}$, in this case) is directly proportional to the pressure, P g, of the undissolved gas above the solution (101.3 kPa, or 760 torr, in this case).
