Carbon cycles through the oceans, soil and rocks, plants on land and in the ocean, and atmosphere. The build up of carbon dioxide released into the atmosphere by burning fossil fuel is the primary cause of global warming. The global biosphere has been helping to offset some of the excess carbon dioxide people have been pumping into the atmosphere.

World of Change: Global Biosphere - NASA Earth Observatory

Protecting Our Planet Starts with You Ten simple choices for a healthier planet. Protecting our planet starts with you. Ten Simple Things You Can Do to Help Protect the Earth. Reduce, reuse, and recycle. Cut down on what you throw away. Follow the three "R's" to conserve natural resources and landfill space.

Protecting Our Planet Starts with You

Details about The Biosphere: Illustrated throughout with high-quality color photographs, this textbook introduces undergraduates to the fundamentals of environmental science. Kaufman and Franz (both Miami U.) examine some of the many environmental problems facing the planet, investigate their various and interrelated causes, and describe current efforts to address those problems.

Guided by our respect for the sanctity of all life and for the interdependent web of all existence of which we are a part; Recognizing the stress placed upon the biosphere through excessive demands upon resources, and mismanagement of those resources for industrial, commercial, and personal objectives; and Acknowledging that we are responsible for

Protecting the Biosphere | Social Justice Statements | UUA.org

While we're best known for our love of one particular type of ecosystem--the gut microbiome--we're huge proponents of ecosystems of all kinds, including the biggest, most diverse one we as humans are in contact with: the environment.. Just like our bodies, the environment functions best when it's in balance.Unfortunately, we're not quite there.

10 Steps You Can Take to Protect the Environment Today ...

Gaia's ecosystem organs - old-growth forests, natural waterways, bountiful oceans, vibrant soils - will be restored and maintained at all costs as global ecological reserves to power the biosphere and maintain a living and livable Earth.

Global Biosphere Collapse, the End of Being, Upon Us ...

To World Leaders, I urge you to support a Global Deal for Nature that safeguards the Earth, protecting at least 50% of our lands and oceans. Scientists say this bold target is needed to prevent the extinction crisis, halt runaway climate change, feed the world, and ensure a healthy planet for future generations.

Global Deal for Nature - Global Deal for Nature

Overconsumption and Population Growth. In the 1990s, environmental scientists Dr. Mathis Wackernagel and Dr. William Rees estimated that humans are using Earth's resources 50% faster than they're being replenished, calculating that the human population will need 2 Earths to support its population and consumption by the year 2030. Essentially, the planet is struggling to support the 7 ...

16 Ways You Can Protect the Environment

By the most general biophysiological definition, the biosphere is the global ecological system integrating all living beings and their relationships, including their interaction with the elements of the lithosphere, geosphere, hydrosphere, and atmosphere.
