Toyota VSC Off & Check Engine Lights can be triggered from something like a loose gas cap. The only way to know for sure is to read the codes with an OBD2 scanner. Trac Off and Check Engine Light on Toyota It is common for the traction control light to come on when the check engine light on your Toyota comes on.

### Troubleshooting Toyota Check Engine Light | YOUCANIC

Yes they are related, usually the VSC (vehicle skid control) warning light will turn on when the check engine light turns on, this is so because the VSC is disabled as soon as the check engine light turns on, the engine light should be diagnosed first and corrected, this can be done by connecting a diagnostic scan tool to get the trouble codes, I recommend you see the Toyota dealer for this.

### My Toyota Highlander VSC and check engine lights are on.

The check engine and VSC (Vehicle Stability Control) lights came on in traffic and the computer set a P0442 code (small leak in EVAP system). Apparently this is very common code on older Toyota vehicles, and it seems to be the default code anytime there's vacuum or fuel vapor leak in the intake, fuel, and or EVAP system.

### Toyota Highlander Check Engine and VSC light, and code P0442

Most Toyota owners will find that when the Check Engine and VSC lights are lit, there is a problem with an O2 Sensor or gas cap. Try tightening or replacing the gas cap for a hopefully cheap fix. To be sure of the problem you may want to take your vehicle to an Auto Zone or NAPA store to have them plug in a code reader to determine the problem.
